It's very east to plant a tree, but it does take a little thought and with anything of this nature it's always worth a quick swap before you let rip - those clever folk over at wikiHow have a rather nice article on how it should be done, with pictures an' all.

http://www.wikihow.com/Plant-a-Tree

Or you could always let Trees for Hosting plant one for you when you take out a web hosting account with us?
